compositions one or more peptides, in particular peptides that are naturally secreted by the pancreas together with insulin in non-diabetics. Such peptides are herein referred to as "insulin-related peptides".

Please replace the paragraph at page 12, lines 7-13, with the following paragraph:

*AD*

In an alternative embodiment, the insulin and/or insulin analog is replaced by an insulin mimetic material that functions to activate the human insulin receptor. Examples of suitable insulin mimetic materials are shown and described in U.S. Provisional Patent Application Serial No. 60/135,278 filed on May 21, 1999 and entitled "Device and Method for Infusion of Small Molecule Insulin Mimetic Materials, which is specifically incorporated by reference herein and forms a part of this disclosure.
